SYSTEM

A-TURF® MONO

A-Turf® Mono soccer field at Ball State University – Muncie, IN.

OVERVIEW

- Featuring Monoslide Ultra XQ — curved shape with multiple vertical ribs (other Mono fibers available).
- Retains the natural grass look during use but with far-superior durability.
- Typical rubber & sand or rubber-only infilled.

SYSTEM | A-TURF® MONO

A-Turf Systems of choice also include a shorter pile (typically 1-3/4"), tufted in a denser fiber matrix that's heavy in face weight (typically 40 – 50 oz. per square yard) and rich in plushness. Common infill options include sub-angular sand and Envirofill, a coated sand available in an attractive green color. This design always includes a ShockPad, so the system has resilience equal to well-conditioned natural grass for its life ... 12-15 years!
