

Delivering Excellence SYSTEMS • CONSTRUCTION • SERVICE

SYNTHETIC TURF • MAXIMUM PERFORMANCE

UNUSUAL COMMITMENT

A-Turf fields have the longest warranty (12 years) because they have the longest life (14+ seasons).

EXCELLENCE! In a word, that's A-Turf. Our name, history, relationships and systems all demonstrate an unusual commitment to excellence in athletic field building.

At its foundation, "field building" is construction work. Specialty construction. So, when decisionmakers compare field builders, it's beneficial to view their synthetic field as such: a construction project.

Staying with the construction theme, we'd all probably agree there are many similarities from one homebuilder to the next in the utilization of materials and components: concrete, wood, drywall, glass, paint and so on. It's unlikely any of us would conclude, however, that homebuilders are all the same. We've learned that the details and intangibles are critical factors in understanding what's the best quality and price relationship; the best VALUE!

The very same holds true for field builders. We all use similar materials and components: fibers, backings, rubber granules, adhesives and so on. Yet, all field builders are definitely not the same. Details and intangibles differentiate field builders and their turf systems.

Understanding true VALUE can be especially challenging in the field-building industry because (1) knowledge seldom comes from the decision-makers'

firsthand experience playing on the field, (2) building athletic fields is truly specialty construction so familiarity is low, and, (3) disseminated information often comes from biased sources ... the field builders themselves.

To help overcome the challenges inherent to the field builder selection process, A-Turf has developed a simple visual (below) to remind decision-makers of what to consider when attempting to identify the best VALUE. Know what the community is actually investing in and how those factors should be evaluated when comparing one field builder against the next.

A-Turf's commitment to excellence includes every segment of our responsibility, from the sales process to the installation, and from the selection of the specification through the life cycle of the field. Join the growing list of A-Turf clients who have increased their familiarity with the importance of investing in a field builder partner that delivers the best VALUE!

May we go to work on your project?

Sincerely,

Jim Dobmeier, President & Founder A-Turf & Surface America

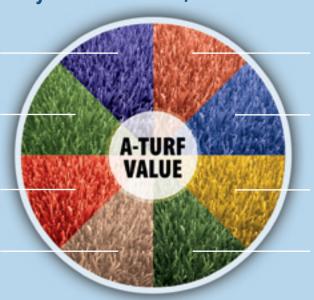

As your field builder, we'll deliver ...

Most Generous System Specification

Best Quality Material Components

Professional Site Inspection or Construction

Superior Craftsmanship in Field Installation

Thorough, Proactive **Project Management**

Professional & Legally Compliant Contract Administration

Responsive **Post-Construction Service**

Industry's Most Comprehensive & Longest Warranty Coverage

CORPORATE STRENGTH

A-Turf is an integral part of the diversified Ecore Group.

As a subsidiary of the US-based Ecore™ Group, A-Turf's capabilities are broad, our bonding capacity is great, our financial strength is sure, our warranties are superior and our approach to business is responsible. A-Turf is synonymous with stability in the field-building industry.

Ecore is North America's largest processor and user of scrap tire rubber, recycling 80 million pounds of rubber each year. It develops innovative solutions that make people's lives better while improving the quality of the environment in which we all live.

"We walked a number of different types of fields, and found A-Turf to be the best. My site visits were invaluable in helping me select a synthetic turf system and company. I recruit for a living and I would never want a kid to come and play for us without first coming to visit our college. The same can be said for selecting a field. You can go to a show, look at a catalog and see samples, but until you go out and actually walk a field and look at it, it's very hard to make an intelligent decision."

Lee Driggers, Former Coach Wheaton College, Wheaton, IL (2012)

Buffalo Bills' New Era Field Orchard Park, NY

Diamond Nation Baseball & Softball Academy Flemington, NJ

Beekmantown High School West Chazy, NY

Sound insulation panels are applied under floor surfaces, concrete slabs and over concrete or wood joist construction in homes and high-rise structures

Commercial flooring offers architects and designers endless possibilities to create personalized flooring for hospitality, recreations, sports, retail, corporate, industrial, healthcare and education applications.

Sister company Surface America leads the industry in safe playground surfacing, with more than 25 million square feet installed coast-to-coast.

Cork and rubber products have fluid-sealing to anti-skid applications for industrial and automotive markets, as well as heat ablative insulation for aerospace.

Sports surfacing with Nike Grind (Nike technology to process and refine sports footwear) – available in rolls, molded tiles and interlocking tiles – have ultraprotection characteristics for sports, fitness and high-traffic applications.

Synthetic turf athletic field builder for all sports and levels of play. Plus a wide variety of other turf surface applications.

COAST-TO-COAST

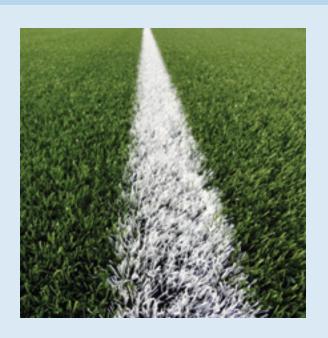

A-Turf has been transforming what America plays on since 2002. From the Eastern Shore to the West Coast ... from Little League baseball to professional football ... college single-sport stadiums to high school multi-sport fields ... indoor practice facilities to outdoor tournament complexes ... park & rec play areas to world-class training facilities ... what A-Turf delivers is BEST VALUE!

Natural Grass – The Perfect Model

Why complicate a simple concept? Perfectly conditioned natural grass is terrific for all sports in terms of playability and safety. Usage and weather, however, quickly prevent natural grass from being perfectly conditioned. Before long, the typical, heavily used grass athletic field is worn, deteriorated, dangerous and unattractive.

While durability is commonly lacking with natural grass, we've all seen pristine natural grass venues that serve as a perfect model for synthetic field builders to emulate. And that's what A-Turf has done – incorporated the great qualities of natural grass into its design: high face weight (lots of fiber blades), resilience and rich colors. We married these characteristics with durability that only top-quality synthetic materials can deliver.

When coupled with an optional ShockPad, your field can have the shock absorption and safety equal to natural grass in perfect shape – day-in and day-out – for the life of the field ... guaranteed. Reduce avoidable concussions by matching the Gmax of your field to the perfect model.

"We had confidence in A-Turf right from the beginning, but we got the most confidence after speaking with other schools that have worked with A-Turf and already went through the process. When we spoke to other athletic directors, they assured us that A-Turf does exactly what they say they're going to do. The athletic directors and coaches we spoke with had nothing to gain from telling us the honest truth and each and every one told us they absolutely loved their field and working with A-Turf."

INSPIRED DESIGN

A-Turf designs and engineers its systems to achieve sport-specific playability goals and industry-leading durability. We partner with Controlled Products, the industry's leading turf producer in both quality and quantity. Our turf features world-renowned TenCate fiber, the most proven fiber worldwide. Our parent company, Ecore, produces the industry's best-performing, resilient ShockPad. Our passion for quality shows in every detail.

SYSTEMS SUPERIORITY

We combine the best components, specifications and craftsmanship for optimal performance and superior value. A-Turf systems are dense, durable and dependable - 24/7. They have outstanding playability and longer life expectancy. A-Turf is known for extremely stable footing, aesthetic beauty, natural resilience, optimal drainage and service to match.

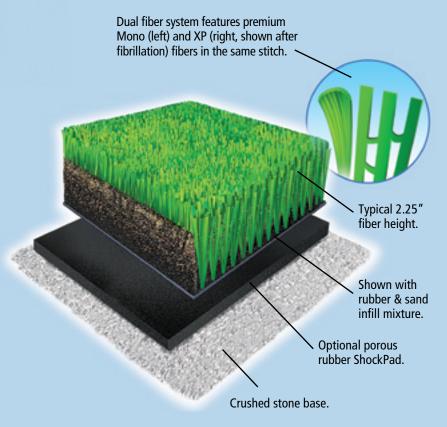

MAXIMUM PERFORMANCE

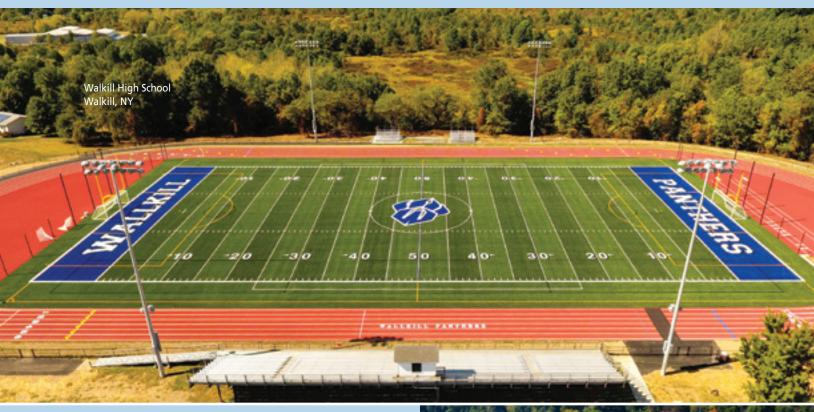

A-Turf® Titan is the industry's ultimate synthetic turf surfacing system, featuring the best combination of aesthetics and durability. A-Turf is the originator of the blended Mono & XP fiber design. Titan is an amazingly plush, natural looking surface with outstanding performance and durability attributes. In addition, Titan has the industry's best safety rating. We have so much confidence in Titan that it's backed by an industry-leading 12-year warranty. In person or on television, watch the Buffalo Bills play home games at New Era Field and see the stunning A-Turf Titan 50 System in action.

GREATEST VALUE

With a synthetic turf field, value is measured by the cumulative cost over the life of the system. It pays to think ahead. A-Turf systems perform exceedingly well over time because of our steadfast commitment to best quality materials, generous specifications and superior craftsmanship. Player footing, resilience for safety and performance, aesthetics, natural ball response and long-term durability all contribute to making A-Turf systems number one in the industry. Our high-density systems yield upright fibers and stable infill levels even during heavy play, while maintaining optimal permeability and drainage. The end result is a turf system yielding perfect playing conditions for the very, very long haul!

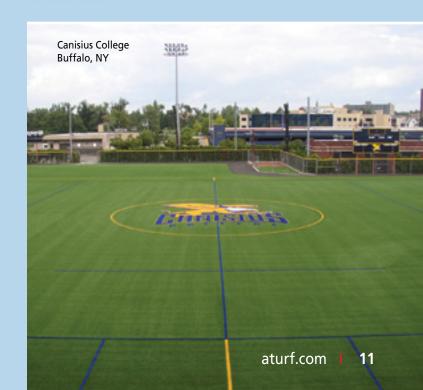

LONGEST WARRANTY TUTAN

A-Turf, the originator of the 12-YEAR WARRANTY, confidently offers the industry's most comprehensive and longest warranty because we employ best practices during every step in the field-building process. From design to raw materials, key components to suppliers, contract administration to installation craftsmanship and post-construction service, A-Turf places quality as priority one. Our industry-leading company warranty - backed by the diversified, conservatively managed ECORE group – is accompanied by a third party insured warranty from an "A" rated carrier. We invite you to ask for a copy of both our company warranty and third party insured warranty policy.

EXPERIENCED BUILDER

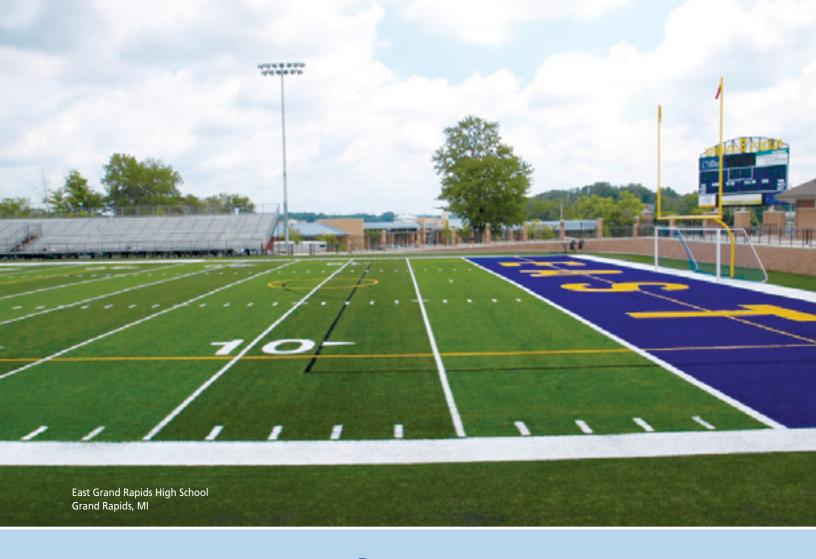

A-Turf has built hundreds of athletic fields for high schools, colleges & universities, parks & recreation departments, community organizations, private ventures and professional venues throughout North America. From the smallest playing surface at an elementary school to a six-field, 60-acre practice & tournament complex, we are at your service. A-Turf's certified crews perform turnkey operations (from sitework to final touches) or build synthetic turf fields as a sub-contractor. We specialize in building new athletic fields from the ground up, converting natural grass fields to synthetic turf, and replacing synthetic turf fields that have reached their useful life.

"The most important piece in my field selection process was actually getting onto a field and looking at the product. We spent a day with A-Turf visiting various fields, ending up at Ralph Wilson Stadium in Buffalo. I like to get down on my knees and look for waviness, bumps and seams. When I visited the A-Turf fields, I saw an absolutely unbelievable product in the lack of waviness and seams. I went to a brand-new field done by a different field builder and I saw seams and an uneven quality. I think A-Turf's fields set them apart from other fields I have visited and observed."

Cyle Feldman, Athletic Director Stow-Munroe Falls High School, Stow, OH (2012)

TURF REPLACEMENT

As a wholly owned subsidiary of ECORE International - North America's largest processor and user of recycled rubber - A-Turf takes "Green Thinking" to a new level. With the replacement field market at the beginning point of significant growth, A-Turf's R-THREE Program is right on time.

REMOVE the existing field systematically with equipment engineered for the job.

REUSE components of the existing field both within the new field and in other unrelated, productive applications.

REDUCE components that cannot be reused to minimum size and most convenient form for highly efficient disposal.

Ask about A-Turf's unique ... efficient ... cost effective approach to replacing your synthetic field with an A-Turf System.

Research A-Turf's R-THREE PROGRAM while ensuring you're investing in a maximum useful life system. Get 12 years ... guaranteed!

QUALITY MATTERS

A word we hear a lot from our clients is "quality." They express it when describing our people during the sales and project management phases. They use it when sharing their thoughts of our installation process and people during construction. And they come to value the quality of our material components and engineered systems. After 13 seasons, the A-Turf field was replaced with a new A-Turf playing surface.

"A-Turf's 'Premier' field is a fantastic system that enables Hersheypark Sports and Entertainment Group to host more events at Hersheypark Stadium. We love it so much that we replaced our A-Turf field that was installed in 2003 with a new A-Turf field in 2016."

Rod Underkoffler, Dir, Facility Operations, Hersheypark Stadium, Hershey, PA

And host more events they did ... and still are! Hersheypark Stadium is a major venue for district and state high school sports, college athletics, band competitions and music concerts.

Hersheypark Stadium is just one of the many secondgeneration A-Turf fields across the United States. Clients were so pleased with the field building experience, the turf's performance, and the post-construction service that they didn't hesitate to call on A-Turf again when it came time to replace the playing surface.

OTHER USES

A-Turf's synthetic grass can be found indoors at places like the batting tunnel at Oriole Park at Camden Yards, a fitness room at Yankee Stadium and baseball training at Sports Performance Park. It's also in use outdoors across the country on school and park playgrounds, all-purpose play areas at schools and day care facilities, bocce courts at eBay headquarters, as commercial & residential lawns where water restrictions exist, and places such as around airport runways where mowing can be hazardous and expensive.
